## ***Highly manoeuvrable and versatile stand.***

Our stand has been manufactured to the highest standards, with four sturdy castors, wide well spaced legs to fit under and around theatre tables, a "solid feel" hand wind, up / down mechanism and a reversible X-ray unit-mounting bracket.

This stand is both versatile and highly manoeuvrable.

As shown above with the Handy portable X-ray unit, this stand comes in three separate sections, which makes it very easy to transport.
